Projects and Works

- **Project Thesis Management System :**

  The Project Thesis Management System is a cloud-based solution that helps manage academic projects and theses. It provides a central platform for students and faculty to collaborate, communicate, and track the progress of their projects and theses. The project was Awarded "2nd Runner Up" for Project showcase event in SU CSE DAY-2023.

- **eRecruitment System :**

  As part of the eRecruitment System project, my responsibilities in 2020 encompassed developing and implementing key modules such as Exam, Result Allocation and Publication, and Seat Plan, while fostering effective collaboration within cross-functional teams.

- **Somiti Software :**

  Drawing upon my practical experience as a loan officer, I effectively managed the complete Somiti Software project, overseeing its development from start to finish and ensuring smooth integration of features customized to meet the requirements of the lending process.

- **Investor Management System** :

  As a key contributor to the "Investor Management System" project, I actively contributed to the development and implementation of critical features such as Investor and Partner Management, Investment Tracking, Shares and Profits Allocation, and Withdrawal Management, ensuring seamless functionality and efficient management of investor-related processes.

Author and Maintainer of two open source PHP packages: db_craft, onubadok published in packagist. Also worked with some other projects like: HRM, Passport Consultancy Manager, Rentals, Personalized Doctor Predictor(ML) etc.

Professional Skills

- PHP Frameworks: Laravel, Codeigniter4

- Database: MySQL, PostgreSQL

- JavaScript: jQuery, React, Vue3

- Frontend: Flutter, Bootstrap 4&5, HTML, CSS
